INTERNATIONAL CONFERENCE ON SPECIAL EDUCATION IN SOUTHEAST ASIA REGION, 8th SERIES (ICSAR 2018)

SOUTH KOREA, 20th Jan 2018 - A total of 300 plus participants has convened at Daegu University, South Korea for the 8th Series International Conference on Special Education in Southeast Asia Region (ICSAR). This conference is a mean of a joint collaboration between Universiti Kebangsaan Malaysia (UKM), Universitas Pendidikan Indonesia (UPI) and also SEAMEO SEN.

The main aims and goals of ICSAR 2018 are to provide recognition, awareness and a more nurturing platform for world community on the importance to acknowledge on special education and disabilities around them. The issue of disability and special educations may be spreading worldwide, however, not everyone is made a call upon it.

SEOUL REHABILITATION CENTER ON INTELLECTUAL & DEVELOPMENTAL DISABILITIES

SEOUL, 22nd Jan 2018 - The city of Seoul, South Korea were widely known and established for its scientific and technological advancement since the Joseon phase back in the 15th century. Thus, SEAMEO SEN officers and director did not waste the grand opportunity to went, for a visit at the Seoul Rehabilitation Centre on Intellectual and Developmental Disabilities, located at Boramae Park, 219, Daebang Street, Dongjak-Gu, Seoul.

Korea Association on Intellectual & Developmental Disabilities was established to fulfill the mission of welfare for the disabled community to conduct daily human lives so they feel belong to the member of society. This centre working hand in hand on helping the community not only developing their highest potential capacities but also assisting them in utilizing their best talents through few amendments which include counsel, therapy, education as well as vocational training.

The visit aims to have SEAMEO SEN’s officials an experience, gain some insights and deepened the understanding and knowledge on how the other region country are working and progressing towards providing a better environment in Special Education services.

TVET for Special Needs given by Dr. Safani Bari (Acting Director, SEAMEO SEN)
ART THERAPY FOR SPECIAL EDUCATION NEEDS COHORT 4

MELAKA, 22nd Jan 2018 – Along the joint action with Special Education Unit, the Malacca State Education, SEAMEO SEN has organized a course for Art Therapy for Special Education Needs Cohort 4 from 22nd January 2018 until 24th January 2018 based at SEAMEO SEN, Melaka.

This course was attended by 51 Special Education Teachers in Malacca and was an extension for the Art Therapy course cohort 1, 2 and 3 for Special Education Teachers and Students Management Assistant in Melaka. Since children are more naturally artistic and creative, art therapy for special needs children may provide them with an easier way to express themselves. A young child is likely to be more initially comfortable expressing him/herself with some crayons and markers compared to expressing emotions and feelings through words.

After the closing ceremony, the participants were invited for photo session.

SEAMEO CENTRES POLICY RESEARCH NETWORK TASK FORCE MEETING

BANGKOK, 20th Feb 2018 - SEAMEO Secretariat had organized the first meeting of SEAMEO Centres Policy Research Network (CPRN) Task Force which was held at the Hotel Windsor Suites & Convention, Bangkok.

The SEAMEO Centres Policy Research Network (SEA-CPRN) was first introduced as a component of the SEAMEO College, a project launched in 2013. The Network was established to enhance relevancy and sharpen the responsiveness of SEAMEO Centres and the Secretariat to the needs of education leaders for policy research in addressing regional human resource development issues, particularly in Southeast Asia.

This workshop aims to develop Centre Policy Research Network (CPRN) to all SEAMEO Centre and deriving from these joint efforts, SEAMEO members had agreed upon the 4 main functions of CPRN which encompass an inter-center collaboration (ICC), formulating agenda, capacity building own staff or other people as well as knowledge exchange and impact. Gleaning from the joint collaborations and efforts that SEAMEO members had taken, huge anticipation for CPRN had become a reality even though some obstacles arise during the setup.

PHILIPPINES, 6th March 2018 - SEAMEO INNOTECH’s 15th International Conference was held starting from 6th March 2018 until 8th March 2018 located at SEAMEO INNOTECH, Philippines. The SEAMEO INNOTECH 15th International Conference was seen as an opportunity to challenge the traditional paradigms through compelling personal narratives that will re-frame conversations related to inclusive quality education policies, practices, problems and possibilities in the region. Woven together, these stories aim to promote action towards building more equitable and inclusive education systems in Southeast Asia and beyond. Throughout the 3 days conference, participants are made available to discuss 82 agendas on Inclusive Education. These stories on inclusive education served as triggers for the participants to develop their own agendas and conduct their own sessions to answer the big question: “How do we grow a learning community that welcomes everyone?”

The visit purpose was more on to understand the role of SEAMEO SEN GBM as well as to meet the staff and observe the centre’s facilities. The visit was brief and ended with the tour around the centre.
In 2015, countries adopted the 2030 Agenda for Sustainable Development and its 17 Sustainable Development Goals. In 2016, the Paris Agreement on climate change entered into force, addressing the need to limit the rise of global temperatures.

On 1 January 2016, the 17 Sustainable Development Goals (SDGs) of the 2030 Agenda for Sustainable Development — adopted by world leaders in September 2015 at an historic UN Summit — officially came into force. Over the next fifteen years, with these new Goals that universally apply to all, countries will mobilize efforts to end all forms of poverty, fight inequalities and tackle climate change, while ensuring that no one is left behind.

The SDGs build on the success of the Millennium Development Goals (MDGs) and aim to go further to end all forms of poverty. The new Goals are unique in that they call for action by all countries, poor, rich and middle-income to promote prosperity while protecting the planet. They recognize that ending poverty must go hand-in-hand with strategies that build economic growth and addresses a range of social needs including education, health, social protection, and job opportunities, while tackling climate change and environmental protection.

**Definition of SDGs**

Sustainable development has been defined as development that meets the needs of the present without compromising the ability of future generations to meet their own needs. Sustainable development calls for concerted efforts towards building an inclusive, sustainable and resilient future for people and planet.

For sustainable development to be achieved, it is crucial to harmonize three core elements: economic growth, social inclusion and environmental protection. These elements are interconnected and all are crucial for the well-being of individuals and societies.

Eradicating poverty in all its forms and dimensions is an indispensable requirement for sustainable development. To this end, there must be promotion of sustainable, inclusive and equitable economic growth, creating greater opportunities for all, reducing inequalities, raising basic standards of living, fostering equitable social development and inclusion, and promoting integrated and sustainable management of natural resources and ecosystems.

**SDGs and People with Disability**

Disability is referenced in various parts of the SDGs and specifically in parts related to education, growth and employment, inequality, accessibility of human settlements, as well as data collection and monitoring of the SDGs, for instance:

- **[Goal 4]** on inclusive and equitable quality education and promotion of life-long learning opportunities for all focuses on eliminating gender disparities in education and ensuring equal access to all levels of education and vocational training for the vulnerable, including persons with disabilities. In addition, the proposal calls for building and upgrading education facilities that are child, disability and gender sensitive and also provide safe, non-violent, inclusive and effective learning environments for all.
  - In **[Goal 8]**, to promote sustained, inclusive and sustainable economic growth, full and productive employment and decent work for all, the international community aims to achieve full and productive employment and decent work for all women and men, including for persons with disabilities, and equal pay for work of equal value.
  - Closely linked is **[Goal 10]**, which strives to reduce inequality within and among countries by empowering all women and men, including for persons with disabilities, and equal pay for work of equal value.
  - **[Goal 11]** would work to make cities and human settlements inclusive, safe and sustainable. To realize this goal, Member States are called upon to provide access to safe, affordable, accessible and sustainable transport systems for all, improving road safety, notably by expanding public transport, with special attention to the needs of those in vulnerable situations, such as persons with disabilities. In addition, the proposal calls for providing universal access to safe, inclusive and accessible, green and public spaces, particularly for persons with disabilities.
  - **[Goal 17]** stresses that in order to strengthen the means of implementation and revitalize the global partnership for sustainable development, the collection of data and monitoring and accountability of the SDGs are crucial. Member States are called upon to enhance capacity-building support to developing countries, including least developed countries (LDCs) and small island developing states (SIDS), which would significantly increase the availability of high-quality, timely and reliable data that is also disaggregated by disability.

Persons with disabilities comprise an estimated 15 per cent of the world’s population, or one billion people, of whom 80 per cent live in developing countries and are
PORT DICKSON, 20th Feb 2018 - Teamwork and cooperation are very crucial and important in making sure that a team may be able to excel in everything they have been work for. Hence in achieving, SEAMEO SEN had held 3 days and 2 nights ‘Team Building’ program starting from 20th February until 22nd February 2018 at the Eagle Ranch Resort, Port Dickson.

This particular program has been taken apart by a total of 16 SEAMEO SEN staffs including officers and subordinates which the main aim is to improve the quality and teamwork of the organizations’ key people. Several key elements that were being highlighted in this team building efforts are on the basics of teamwork, figuring out on how to create a sense of togetherness, distributing work and roles evenly, and the working competencies needed as an effective team within the organization.

Throughout this whole program, SEAMEO SEN has managed to achieve the main intention of developing and escalating staff’s level of motivation and altering the way of thinking in terms of thinking, shaping personality, equal treatment of gender (gender bias) as well as cultural influence through thoughts and emotions. In addition to that, this program also helps to prepare the staff in terms of expanding their learning curve and adding a variety of skills in becoming more creative
